

Badia Rtimi

Process and Chemical Engineer

ABOUT ME

I am a process and chemical engineer and I like to apply in the training provided by your establishment. Worker, rigorous, available, and with flawless motivation. having a very varied and rich mindset, I am able to get new courses in numerical tools and software to boost my CV and get a job. I'm so interested with these fields. in fact, i attended webinaire in artificial intelligence AI and machine learning

Work Experience

Chemical Group-Gabes (GCT)

03-2018/07-2018

Project Graduation

- Calculate the mass flow rate of ammonia gas scrubbing system
- Excelled at ammonia gas scrubbing system simulation by using aspen- plus simulator
- Sizing a new ammonia gas scrubber system

Chemical Group-Gabes (GCT)

August 2017

- One month engineering placement
- Supervise the stages of sulfuric acid production
- Calculate the mass flow rate and the energy of frequent

Cement Society of Gabes (SCG)

July 2017

- One month engineering placement
- Participated in studying and optimizing of a bag filter

Chemical Group-Gabes (GCT)

July 2016

- One month work placement
- Took part in different fertilizers analyses

Academic Education

Chemical-Process Engineering
(Ecole Nationale d'Ingénieurs de Gabes :ENIG)

2015-2018

2-year selective physical-chemical preparatory classes leading to ENIG
(Institut Supérieur des Sciences Appliquées et de Technologie de Gabes :ISSAT)

2013-2015

High school diploma in science plus university entrance
Taher el Hadded high school

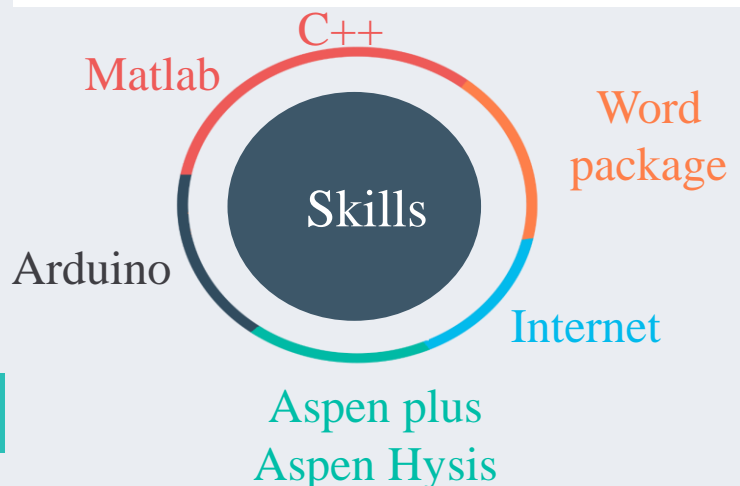

2012-2013

Accreditations and Certifications

Personal development center : the Optimist

2016-2017

Participated in ISO 9001v 2015, ISO 14001v 2015 , OHSAS18001v 2015 standards formation

Languages

French (certified in diplôme d'études en langue française :DELF B2)

English

Arabic Mother tounge
